

College-Wide Outcomes

The following learning outcomes describe the knowledge, skills, and responsibilities our students should acquire as a result of their studies at Lake Superior College.

Foundational Knowledge of the Intellectual, Social and Natural World through study in:

- Career-focused programs
- Liberal arts
- Sciences

Focused by engagement with discipline-specific questions, both contemporary and enduring

Intellectual and Practical Skills, including:

- Critical and creative thinking
- Information literacy
- Inquiry and analysis
- Quantitative literacy
- Synthesis and application
- Teamwork and problem solving
- Written and oral communication

Practiced extensively, across the curriculum, in the context of progressively more challenging problems, projects, and standards for performance

Personal and Social Responsibilities, including:

- Awareness and practice of sustainability
- Civic involvement
- Ethical reasoning and action
- Intercultural competence
- Self-development and lifelong learning

Anchored through active involvement with diverse communities and real-world challenges
